world history workbooks: *The World History Workbook* David Hertzal, 2009-03-16 This innovative and user-friendly two-volume workbook is designed to guide students and instructors through the ideas and methods of the growing field of world history. Useful as either a supplement or a core text, this hands-on book provides all the elements necessary to conduct a full-fledged world history course, including narrative, projects, primary sources, and a glossary of terms. Using the guiding thematic argument that world history is the history of a single humanity, David Hertzal asks students to examine historical universals such as language and the unified heritage of languages, genealogy, myth, motifs and themes of literature, and archetypes. Rather than provide exhaustive coverage of each of these vast topics, the workbook provides judiciously selected historical examples as models from which instructors and students can open discussion suitable to the time and circumstance of the particular class. The projects guide students to recognize universals in their

own lives and societies, allowing instructors and students to pursue historical themes in a critical and open environment. Despite the rigor of the comparative method and the extensive use of primary material, the workbook retains a simple but powerful theme and approach, making it accessible to students representing a wide range of educational and social backgrounds.

world history workbooks: *The World History Workbook* David Hertzel, 2023-02-13 For more than two thousand years, the Socratic dialogue has been a hallmark of higher education and the method which defines critical thinking. David Hertzel's textbook provides a framework of world historical sources, narratives, and questions through which instructors can gracefully adopt a Socratic method for their General Education classes. No textbook in any field applies critical methods more successfully than does this one. Now in its third edition, the author and editors at Rowman and Littlefield have updated *The World History Workbook* to include a new chapter on the mixed legacy of globalization and modernization, both defined as having descended from humanist principles. The third edition also includes several additional primary sources, revised numerous projects, passages on a diversity of world historical topics including women, folktales, Swahili as a lingua franca, and the personal significance of ancestry. The core material of narrative, primary sources, and projects remains intact from the first and second editions. The Workbook follows the argument that humans share a common history, albeit with contrasting particular experiences. The subject of the course therefore addresses the place students and their instructors hold in human history. Students are encouraged to explore historical problems that persist in modern society and project questions suggest grand yet accessible discussion topics including justice, gender, bureaucracy, human rights, individuality, ancestry, faith and reason, and other timeless human problems.
